Operating Instructions

1. Fill adequate hydraulic oil in to the pump station's oil tank to the level of gauge. Do NOT operate the oil pump with no oil, a few oil or in reverse rotation.
2. Be careful to connect the delivery port of pump station with the cylinder's inlet and outlet as marked in the direction consistent with the operation instruction.
3. DO NOT operate the compressor when the worktable latch is normally locked with the worktable beam.
4. When working load reaches 80% of oil compressor's rated load, the distance between supporting points on the worktable panel must be 0.5 times greater than the worktable beam's rated pitch in transverse direction and 0.4 times greater than the worktable beam's rated pitch in longitudinal direction.
5. The compressor must be preserved to be 80% of the rated load before delivery. The user is allowed to gradually reduce the pressure to its original compressor qualified for long time.
6. Please refer to the Operator Manual for details.
